Asbestos Contained Building Materials (ACBM) will not be used on any project within the St. Johns Unified School District #21. ACBM is defined as any building material having an asbestos content of 1% or more. Typical examples of materials that may contain asbestos and therefore would be considered ACBM are: vinyl asbestos tile, certain forms of adhesive used to hold vinyl tile, certain forms of adhesive used to hold cove base molding, some thermal insulation, and transite paneling. The above list is not complete but merely represents some of the material more commonly found on job sites that are ACBM. As per EPA guidelines, some roofing material used on the exterior of the buildings may be considered ACBM. Address any questions concerning asbestos to Nelson Davis at St. Johns Facilities

Solder and paint with any amount of lead is no longer authorized, and will not be used in any District projects.

HOLD HARMLESS:

Interface of work under this contract with work containing asbestos shall be executed by the contractor at risk and discretion with full knowledge of the currently accepted standards, hazards, risks and liabilities associated with asbestos work and asbestos containing products. By execution of this contract, the contractor acknowledges the above and agrees to hold harmless the owner, employees and agents and assigns for all asbestos liability which may be associated with respect to the above-mentioned standards, hazards, risks and liabilities.

I have read the above information and will comply.

CONTRACTOR, The person, corporation or company who makes the accompanying Bid, having first been duly sworn, deposes and says: All materials to be used in the above referenced project are and shall be free of asbestos.
