

St. Johns Unified School District Programs and Methods Middle School Math Programs

Middle School Math Programs

The Middle School uses a number of math programs and Apps both in the presentation of lessons and with student intervention.

TENMARKS

TenMarks is an online math program with a built-in curriculum for students in first grade through high school. After teaching a lesson using the tool's curriculum resources, teachers handpick and assign content for students to practice online and then track student progress toward standard mastery.
