August 2015

Dear Parents:

There are several students at Scotts Ridge Middle School who have severe life-threatening food allergies to peanuts and tree nuts. Strict avoidance is the only way to prevent a dangerous allergic reaction.

The school staff does everything possible to provide these students with a safe environment. In an effort to allow these students to fully participate in all class activities, parties, etc. – please do not send any food items containing any type of peanut product, peanut butter or peanut oils, as well as nuts of any kind. In addition, if you are preparing any party snacks for the class, we remind you to please check the labels before using any ingredients .

Please feel free to contact me or Mrs. Gail Pavlik, SRMS School Nurse, should you have any questions. Your cooperation in this important matter is greatly appreciated.

Sincerely,

Timothy J. Salem
Principal
