

Collier Elementary School – Home of the Coyotes. Collier Elementary School offers a comprehensive K–8 education designed for the whole child. Our highly qualified staff gives each student individual attention through a balanced program of academics, arts, and athletics. The strong family and school relationships provide an exceptional place for students to learn and grow. Being a Coyote means being part of a community that works to promote learning and growing for a lifetime.

Country Place Leadership Academy – Home of the Mustangs. At Country Place Leadership Academy, we believe that everyone can be a leader! And that everyone has genius! Here we prepare young leaders for future jobs, some that don't even yet exist. We work to empower students to lead in their own learning! We educate the whole child through leadership, comprehensive academics, gifted, art, music, technology, physical education. Every student has leadership roles in their classrooms and throughout the school. At the Country Place Leadership Academy, you see students greeting their classmates, coordinating Field Day, planning field trips and organizing community service projects. Both staff and students are participating in The Leader in Me Process which includes knowledge and use of The 7 Habits of Highly Effective People. Students work to become effective leaders and find their voice. If you are interested in being the next CEO, Senator or president, then join the Mustangs in their quest to be the ones that lead change.

Estrella Vista STEM Academy – Home of the Hawks. Estrella Vista STEM Academy is innovative. Here, students are preparing to be competitive in high school, higher education, and the market place. What sets us apart? We focus on engineering by using Design-Thinking (Known as DT). While working through the curriculum, students define real-world problems, brainstorm ideas, develop prototypes and evaluate outcomes. Estrella Vista Hawks are often seen collaborating and presenting. STEM showcases are a highlight on this campus. If you are interested in being a structural, civil or mechanical engineer, then Estrella Vista STEM Academy is the place for you.

Fine Arts Academy – Home of the Falcons. We live in a world propelled by creativity, where humans are brought together by experiencing the arts, such as Music, Dance, Theatre, Painting and Sculpting. In order to promote creativity, we provide multiple opportunities for students to design, perform and share as a community. As our students go through each grade they explore various aspects of the Arts. The Fine Arts Academy, home of the Falcons, educate students in Kindergarten through 8th grade, using integration of the arts throughout their daily instruction. Join us on this creative adventure that allows all students to soar to unlimited success.

Littleton Elementary STEM Academy – Home of the Firebirds. Our world needs skilled individuals to unleash the power of computing and develop solutions for the problems of today and the future. In the United States alone, the number of careers in computer science are on a dramatic rise and the gap between qualified graduates and unfilled position is also growing. At the Littleton Elementary STEM Academy, we believe our students deserve to be introduced to computer science in their elementary years, so they have a head start for high school, college and the world! Our students

receive instruction that is grounded in the traditional subjects, but what sets us apart are the opportunities our students have to explore problems that emphasize the use of computers to simplify solutions. All students have access to computers - most on a 1 to 1 basis. This gives students access to the latest tools and software to develop the skills necessary to explore and engage relevant computer science topics, approaches and skills, like coding and robotics. Check out our Collaboratory where students plan, design and create. Littleton Elementary is THE school for computer science immersion. Choose to be a Firebird if you think you are the next software developer, robotics engineer or video game developer.

Quentin STEM Academy – Proud home of the Sharks! Quentin STEM Academy is where learning takes action!! Health, fitness and the sciences are infused into your child's educational experience. Some of the things exclusive to our students are the introduction to structured play that supports social emotional learning, partnerships with educational and health science industry organizations that guide our students towards employment into the health industry, dissection opportunities for our junior high students and project based learning focused on the health/sciences and fitness. A healthy lifestyle commitment can have a positive impact on behaviors and academic performance. At Quentin STEM academy we combine health and life sciences throughout the curriculum to gear students toward a career as a doctor, pharmacy technician, physical trainer or an athlete. If healthy choices is your passion, come swim with the Sharks.

Tres Rios Service Academy – Home of the Pumas. Tres Rios Service Academy is a K-8 school focused on preparing students to positively impact a changing world. Students are provided with the knowledge and skills to succeed in a world that holds many opportunities and challenges. At Tres Rios, we use the concept of "service learning" to integrate meaningful community service, with instruction and reflection, to enrich the learning experience, teach civic responsibility, and strengthen our community. If you are considering a career in law enforcement, teaching, hospitality or the military, Tres Rios Service Academy is the choice for you. While service learning is a focus of our school our students still enjoy challenging academics, physical education, art and technology in their course of study. At Tres Rios Service Academy Pumas Link Learning to Life each and every day.
