Parent/Guardian Achieve@Home Event Information

Session: Engage Families with Achieve3000 Solutions

Date: Thursday, September 17th, 2020

Time: 5:00 - 5:45 pm

Location: Zoom Session

Register using this [link](#). You can register before the day of the event!

What to Expect:

Students can make significant gains in Lexile scores when they regularly complete two or more Activities per week with average scores of 75% or higher. This session equips parents with what they need to support literacy at home and boost that performance by encouraging home use of Achieve3000, online or offline with our mobile apps and with Achieve3000's Home Edition, designed just for parents/families.

What You Will Need:

Your child's school will provide the necessary equipment for the live session. You'll just need to bring your enthusiasm for your child's success!

For more details about Achieve3000 and the Home Edition, please see reverse.

ACHIEVE3000®
The Leader in Differentiated Instruction™

What is Achieve3000 and the Home Edition?

Achieve3000's online literacy programs, KidBiz3000®, TeenBiz3000®, and Empower3000® help your child improve reading comprehension, fluency, vocabulary, and writing. These important literacy capacities will impact your child's overall achievement in school, and frequent use of Achieve3000's solutions has been proven to significantly impact success in college and career. The Home Edition keeps you closely involved in your child's progress, enabling you to monitor and reinforce your child's literacy skills at home.

How does Achieve3000 work?

Each day Achieve3000 sends your child a lesson built around a kid-friendly, stimulating science or social studies topic. Every student in the class receives the same lesson, but with content tailored to meet each child's individual reading level. The lesson includes a Five-Step Routine designed to build important literacy capacities that will prepare your child for college and career success.

How can I get involved?

You can share in the fun at home, or anywhere where there's Internet access, by logging in to your free Home Edition for parents. The Home Edition

provides tools that allow you to lead your child to literacy success, by allowing you to:

- **Access your child's lessons:** With the Home Edition, you can log on to your account to see what your child has learned each day so that you can review it with him and spark discussion.
- **Monitor progress:** The Home Edition will allow you to see your child's work as well as reports that will let you know how your child's literacy skills will impact his success on state assessments and future college and career endeavors, how his reading proficiency has changed over time, and information on how your child is spending his time on the program.
- **Encourage further success:** As a parent, you have the option of finding additional lessons on topics that you think will interest your child and exploring them together.
- **Communicate via inter-program email:** You also can take advantage of our safe, inter-program email that allows you to communicate effectively with your child or his teacher(s). You will also receive weekly reports that will keep you updated on your child's performance at a glance.
- **Take advantage of resources and fun:** In addition to those powerful tools, you and your child can explore the Career Center, Writing Center, Stock Market and Game Room, all tools that offer a fun way to build literacy and find success, in school and beyond.
