The federal funding in ESSER I and II is unprecedented, and with an anticipated ESSER III on the horizon, school districts across the Commonwealth will be tasked with the challenge of spending these federal funds in a relatively short period of time. This webinar presentation will cover the short and long-term planning implications for the use of your federal dollars, the eligible uses, the timeframes, the requirements, and the flexibility. We'll also discuss some of the easiest ways to use these funds, property tax considerations, fund balance implications, and how to prepare to prevent future financial challenges when the funds go away.
