Attention Students and Parents

From the Principal:

To provide students with a more safe and secure school environment and to provide our administration with the communication tools we need to immediately inform students and parents of important and urgent information, we are happy to announce the implementation of **SchoolTipline™**.

SchoolTipline is the result of a multi-year university research project that studied how students and parent are an essential part of the school safety process. **SchoolTipline** allows students and parents to anonymously communicate school concerns or threats to administration through the Internet or text messaging.

Because of our relationship with **SchoolTipline**, we now benefit from the following:

SafeTalk™ Anonymous 2-Way communication between students (or parents) and administration by Text Messaging or through Web-based reports.

MassAlert™ Administration can send out up to 6,000 text messages and/or emails per minute if the need for quick communication to parents/students arises.

OnlineSurveys™ Provides a quick and automated way to create surveys to statistically track effectiveness of school initiatives and gain awareness of student safety concerns.

Warm Regards,

Your Principal
