

## Safety Patrol

- 4 safety patrol students will be on duty at a time and they will each serve as safety for one month before the next group of 4 rotates in
- Safety vests are to be shared, please ask students to not take them home, we will have a designated spot for them at the start and end of each patrol day
- Responsibilities include: making sure each child makes it into the car safely, shutting the door after they get into the car and telling the parent to have a nice day
- Cars will line up in the main parking lot with last name signs visible in the front car windshield
- Adult supervisor will announce the child (children) last name and will direct them to one of the 4 colored cones designated as the pick-up locations
- Safety patrol will walk child to the vehicle, open the door, see that the child (children) make it into to car safely and close the door behind the child. Safety patrol will then tell the parent to have a nice day
- Parent with child in car drives away to make room for the next car in line
