

Southside Club Descriptions

- **Magic Social Skills**

This group is open to kindergarteners looking to develop skills such as listening, following directions, sharing, and taking turns.

- **Kids Care Club**

If your child is passionate about community service, the Kids Care Club is a great way for students to serve their classmates, school, and community. This group of caring first graders heads our annual Soldier Stocking Project, which collects donations for soldiers overseas during the Christmas season.

- **Breakfast Book Club**

Do you have a budding bookworm on your hands? Members of the Breakfast Book Club not only read about important life lessons each meeting, they also participate in activities related to each book topic they read. They are currently accepting members in the second grade. For more information, please see the school librarian.

- **Bully Busters**

Open to our third grade students, the Bully Busters Club raises bullying awareness and teaches prevention strategies, while promoting kindness to all Southside students.

- **Separated Families**

Has your family undergone divorce, separation, military deployment, or incarceration? Consider enrolling your third grader in the Separated Families Club. Please contact the school office for the club's enrollment form.

- **Student Council**

Southside's student council participates in a variety of events and activities during the school year. Student council members help with Southside's annual November food drive, recycling shed (benefitting Build a Better Blackford), and the Salvation Army's Red Kettle Christmas Campaign. Members must be in the third grade, exhibit role model behavior and have a willingness to engage in school and community outreach opportunities. Applications are available in the school office.

- **Just Say No Club**

United in their commitment to making good life choices, the members of the Just Say No Club arm their fellow Southside students with information in the prevention of negative peer pressure and destructive decisions. The club activities center around raising awareness of the dangers associated with drugs, alcohol, and other harmful behaviors.

- **The Math Club**

Does your child excel in math? Consider enrolling him/her in Southside's math club. Members participate in Mathematics Pentathlon®, an academic competition that enhances problem solving skills in new and fun ways. For more information regarding Mathematics Pentathlon® please visit <http://www.mathpentath.org/mp/programsummary.html>.
