1st Reading – Regulation CKA-R3

CODE: CKA-R3

PERMITTED AMMUNITION FOR SCHOOL CONCEALED CARRY

All ammunition for concealed carry firearms while on school property will be inspected by the head official of the training company and local law enforcement for suitability.

1. Ammunition will be up-to-date current modern manufacture from the following manufacturers: Cor-Bon, Federal, Remington, Hornady, Speer or Winchester.

2. Ammunition: the only ammunition approved for carry on PCSD6 property will be lightweight jacketed hollow point ammunition, optimized for effectiveness and for limited penetration of intermediate obstacles. Bullet weights not exceeding 115 grains (9mm), 135 grains (.40 S&W), or 165 grain (.45 acp), .38 Special with 125 grain. Selected ammunition must be tested for function during initial training, and will be documented in the individual's application packet (*CKA-R1 – Application to Carry Firearm on School Property*) and certificate of training completion.

3. Some recommended defensive ammunition that fit the above requirements are: Federal Hydra-Shok, Hornady Critical Defense, Speer Gold-Dot, Federal Premium Personal Defense HST, Winchester PDX1 Defender, Remington HD Ultimate Defense, Federal Personal Defense and Cor-Bon Pow'r Ball.
