

**PARK COUNTY SCHOOL DISTRICT #6
BOARD OF EDUCATION POLICY**

CODE: IGC

PILOT PROGRAMS

The District encourages innovative programs developed by professional educators, which are supported by sound educational philosophy and research. The professional staff is encouraged to seek improvement of the educational programs in the schools through appropriate means, including carefully designed experimental programs.

These innovative programs will be considered pilot programs and may originate at the individual classroom level, building level or district level. Approval of the plan must be obtained through the Curriculum Pilot Program Procedure (IGC-R).

It will be the policy of the district that innovation on a regular basis is critical to maintaining a quality learning program for students at both the elementary and secondary level. Planning for improvement of the district's learning program must always include innovative programs developed by the district's professional educators and supported by sound educational philosophy and research.

Adopted: 1/20/98
