

**PARK COUNTY SCHOOL DISTRICT #6
BOARD OF EDUCATION POLICY**

CODE: IL

EVALUATION OF INSTRUCTIONAL PROGRAMS

The Board of Trustees recognizes the need for constant evaluation of the instructional program in order to comply with State Department of Education requirements and to fulfill the needs of the students and the expectations of the community. Therefore, the Board authorizes the professional personnel, directed by the superintendent, to plan and carry out the evaluation of the instructional program.

The evaluation will be designed to compare student progress with the aims and objectives established by the curriculum plan. Such means and instruments as are necessary to conduct this evaluation fairly, fully, and constructively in respect to all teachers and students may be used. Evaluative devices may include pre-tests and post-tests furnished by textbook publishers, teacher made tests, teacher observations and judgments, standardized tests, and skill check lists.

Determination of curriculum adequacy, quality and the scope and method of educational programs shall be the first concern of the Superintendent. It will be the Superintendent's responsibility to determine, through personal visits and through regular reports received from the staff, the adequacy, quality and progress of the educational program in individual schools, to suggest means for improvement, and to report any deficient condition of affairs to the Board.
