## RMS-7th Grade

### CALENDAR EVENTS

March 22-26 Spring Break  
Mar. 31 Half Day (A Day)  
April 2 Non-Attendance Day  
April 9 Quarter 3 Ends  
April 14 Half Day (B Day)  
April 28 Half Day (A Day)

**ELA:** The students will continue to learn about different genres during their fiction unit. They have learned about science fiction and drama, and for next month they will read several realistic fiction selections. The reading selections will focus on several different cultures. In language arts the students will learn everything they need to know about verbs and how to use them correctly when writing. They will also show case their writing skills by writing a comparison and contrast essay.

**Social Studies:** We continue to be VERY busy in social studies class! We have been pushing forward learning about our rights that are located in the Bill of Rights as well as learning and highlighting important information in other amendments. We are now concluding with that section of the Constitution and we will be turning our focus to the Legislative Branch. So please find your blue books and dust them off because we will begin working in them again when you return from Spring Break on March 29<sup>th</sup>.

**SCIENCE:** Students will continue learning about animals and ecosystems through March Mammal Madness and the Amplify jellyfish dilemma. My office hours are 2:00-2:45, Monday-Friday, and I would love to talk to any of my parents or guardians with any questions or concerns. Please send me an email at [kpeterson@sd88.org](mailto:kpeterson@sd88.org) to set up a meeting.

**Math:** Happy March! Mathematicians will continue to explore expressions and equations before spring break. Make sure to catch up on all missing assignments and spend time in MobyMax. If you have any troubles or questions remember there are office hours daily until 2:45.

**PE/Health:** PE will continue to exercise virtually mixing it up with crossfit and circuit training exercises. Health will continue in Ch. 3 learning mental and emotional health.

**In STEM,** Currently we are working our way through a superhero physics problem! After break we will build rockets. Students will need the materials listed in Google Classroom. Please let me know if you can not get them.

**French:** Our RMS scholars are working on Question culturelle, c'est la rentrée, un calendrier scolaire. They are also playing French games while learning French. Please check powerschool for updated grade information, and continue to reach out if you have any questions
