To Whom It May Concern:

I would like to thank Student Choice High School at the Kroc Center for helping our former students recover the high school credits needed in order to graduate. It is our goal that all of our students succeed and graduate with their cohort, but sometimes students fall behind on credits and have problems staying on track at our Early College High School. Therefore, some of our students, in an effort to graduate on time, have had to leave our school and have chosen to go to your school where they have been able to take classes at their own pace and recover the credits necessary in order to graduate. Some have stayed and graduated with your school, and some have returned to our school to graduate with their cohort. Either way, we are happy that with your help, they have been able to get back on track and earn their high school diploma! Thank you for your efforts.

Sincerely,

Brian Snoddy
