

Greater Johnstown Career and Technology Center

Dear Forest Hills School District Parent(s)/Guardian(s):

As Forest Hills School District students transition into remote learning, I would like to provide you with an educational update for your son/daughter. As I am sure you are aware, Greater Johnstown Career and Technology Center (GJCTC) teachers have prepared for many situations related to COVID-19. For this situation, here is what we have planned.

At this time, all Forest Hills students are being provided the following coursework remotely: OSHA 10, S/P2, and other program specific curriculum.

- OSHA 10 – Is an approximate 15-hour multi-industry curriculum that leads to a National Safety Certification once completed.
- S/P2 - An approximate 10-hour industry-specific curriculum that supports ACT 6 and Act 158 graduation requirements.
- Program specific curriculum - These assignments are directly related to your son/daughter's specific course of study

Please continue to have your son/daughter check their email account, CANVAS, and Remind Account for when these assignments are released. Many assignments have already been made available. If you have any questions, please do not hesitate to contact your son/daughter's teacher.

Sincerely,

Jason M. Hicks, D.Ed

Principal
