Pre-Write Rock Cycle
For each of the three steps in the rock cycle, tell how you will personify the rock to accurately reflect what is going on. This is where you should include the use of all your vocabulary. Use list format in each box to remember what vocabulary to use where, and make note of how you will use the word.

The Rock Cycle

Igneous Rocks
It's hard to believe, but I will never die. I am a rock. Usually people think of me as unchanging, but this is simply not true. I am constantly being transformed through the rock cycle. The rock cycle is the formation, breakdown and reformation of a rock as a result of sedimentary, igneous, and metamorphic processes. The rock cycle is a picture of my life. It is used to describe how I can take three very different forms, and how Earth processes facilitate these changes. Each step in the cycle contains a collection of rock types that differ from each other on the basis of the size, shape and arrangement of mineral grains. I have been many different types of rocks during my many trips around the rock cycle. I would like to tell you about my most recent trip around the rock cycle.
I hope you enjoyed your trip around the rock cycle. Although you were able to see me in three different steps of the cycle, this is merely a fraction of the many forms I have been and will become. Maybe one day I will become your diamond ring or the decorative rock in your front yard. Even better, I'd love to visit the beaches of Hawaii and soak up some sun. It's time for me to get ready for my next trip, so I'll be seeing you later; even if you don't recognize me.
