

Dear Parents and staff,

The Department of Agriculture has extended the summer food program through December. What this means for us is that we have been approved to feed all of our students for free through December. This includes breakfast and lunch on school days Monday through Friday. This will begin immediately (today). We encourage you to take advantage of this opportunity.

Parents, please continue to fill out the free and reduced meal applications and return them to your child's school site. In January, we will return to our normal fees for meals. Some of our funding is tied to our free and reduced meal applications. Please fill out and return the forms so we can have the funding necessary to provide critical programs for our students.

Students who are attending through our online option may order meals for free as well. You should have received information previously on how to order meals. You can now do so free of charge.

Best wishes,

Hollis J. Merrell
