The following is an explanation of the incidence lines that appear on the "New Case Weighted Incidence per 1,000 Residents " graphs on the following pages:

Incidence Lines:

----- **High Incidence:** A county is flagged as high incidence when it has more than 100 cases per 100,000 residents over the last two weeks. The CDC uses this as its definition of high incidence. This measure includes incarcerated individuals.

----**New cases per capita** Flagged if greater than 50 cases per 100,000 residents over the last two weeks. Allows for counties with different population sizes to be appropriately compared. More cases mean a greater potential for spread among individuals living in that county, and contributes to a county's overall risk level. This is the cutoff between areas of moderate incidence and moderately high incidence as defined by the CDC. This measure does not include incarcerated individuals.

----- **Low Incidence:** A county is flagged as low incidence when it has less than 10 cases per 100,000 residents over the last two weeks. The CDC uses this as its definition of low incidence. This measure

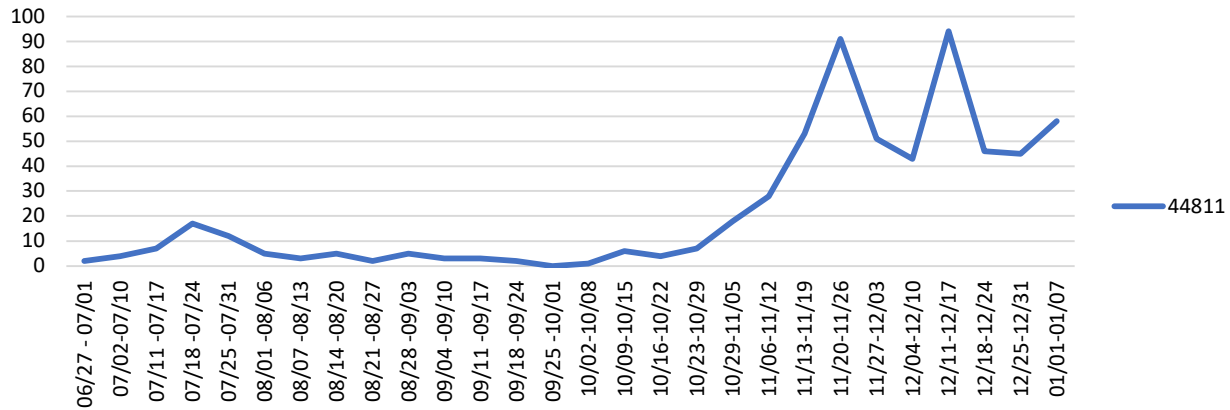

School Data: Be advised that out of County schools do not report school absentee data to HCPH and therefore, school district absentee information is not included in this report for Milan and Plymouth zip codes.

WEEKLY INFLUENZA SURVEILLANCE REPORT

December 27, 2020 – January 2, 2021 (MMWR Week 1)

Highlights

- There were 0 positive flu tests this week and 0 flu hospitalizations.
- Ohio flu activity is currently minimal.
- So far this flu season we have had 2 positive cases and 0 hospitalizations compared to 116 positive cases and 17 hospitalization at the same point last year.

Flu in Huron County

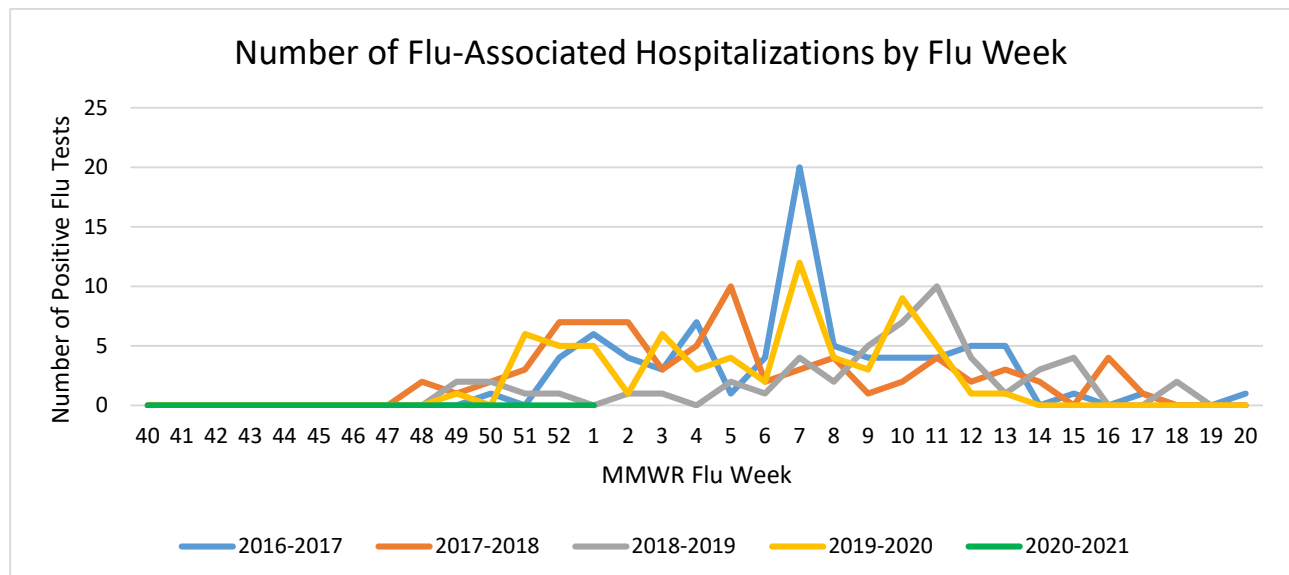

Influenza (flu) Indicator	Current Activity Level	Last Week's Activity Level	Number of Weeks for Trend	This Week Last Year (2020)
Flu Associated Hospitalizations	0	0	● 14	5
Number of positive Flu Tests	0	0	● 5	25

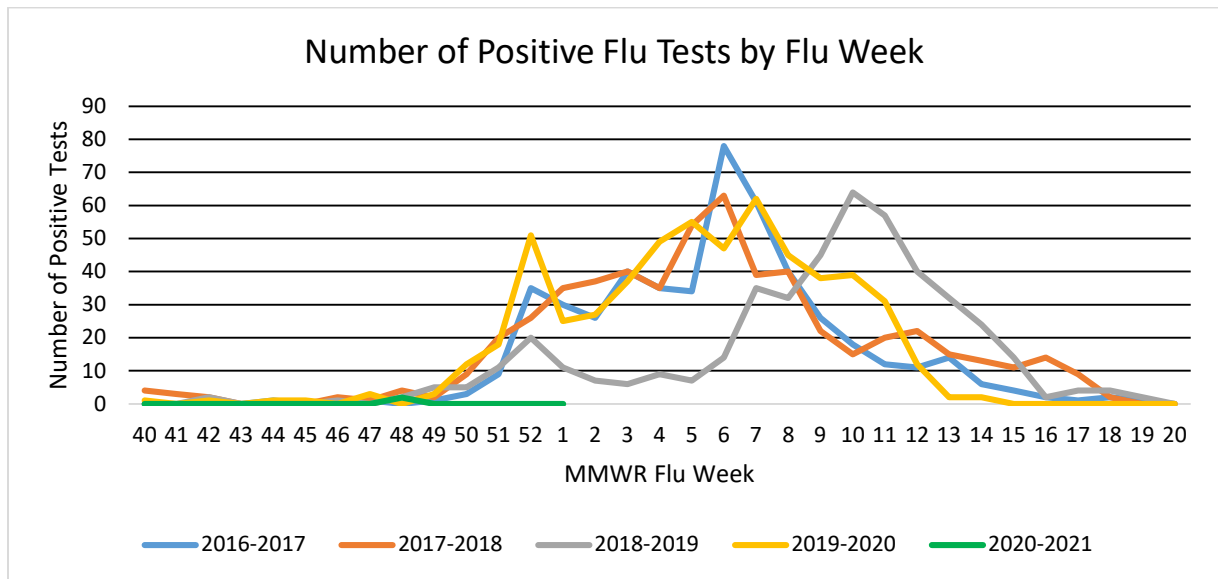

¹Interpret with caution. Indicators with small numbers subject to large weekly percentage fluctuations.

²Number of weeks " ▲ " = Increase (>10%), " ▼ " = Decrease (>10%), " ● " = Stable (-10% to +10%).

Flu Associated Hospitalizations- There were 0 Flu Associated Hospitalizations this week. This data is received through the Ohio Disease Reporting System, based on onset date.

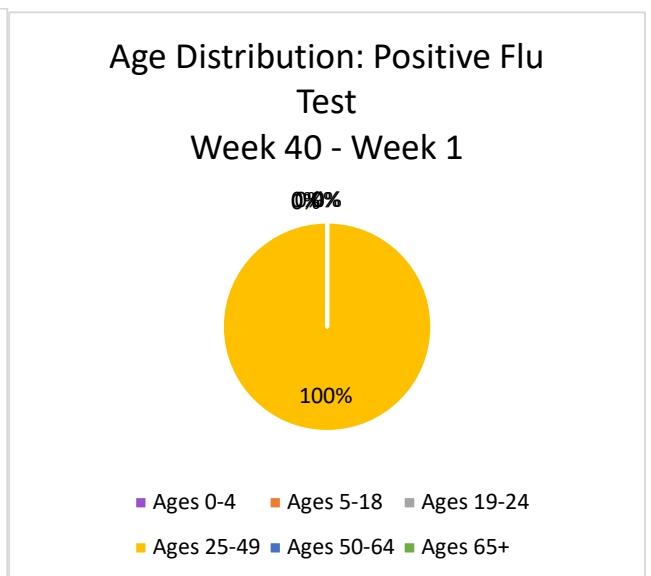

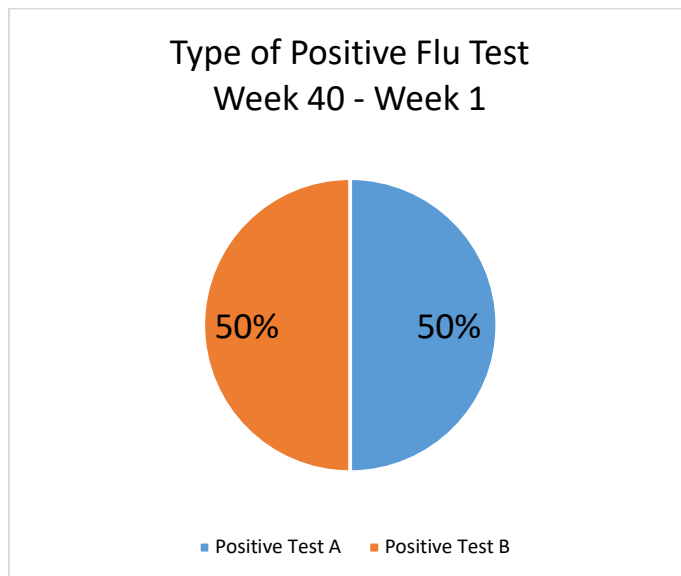

Number of positive flu tests – There were 0 positive flu antigen tests reported to Huron County Public Health by hospitals this week.

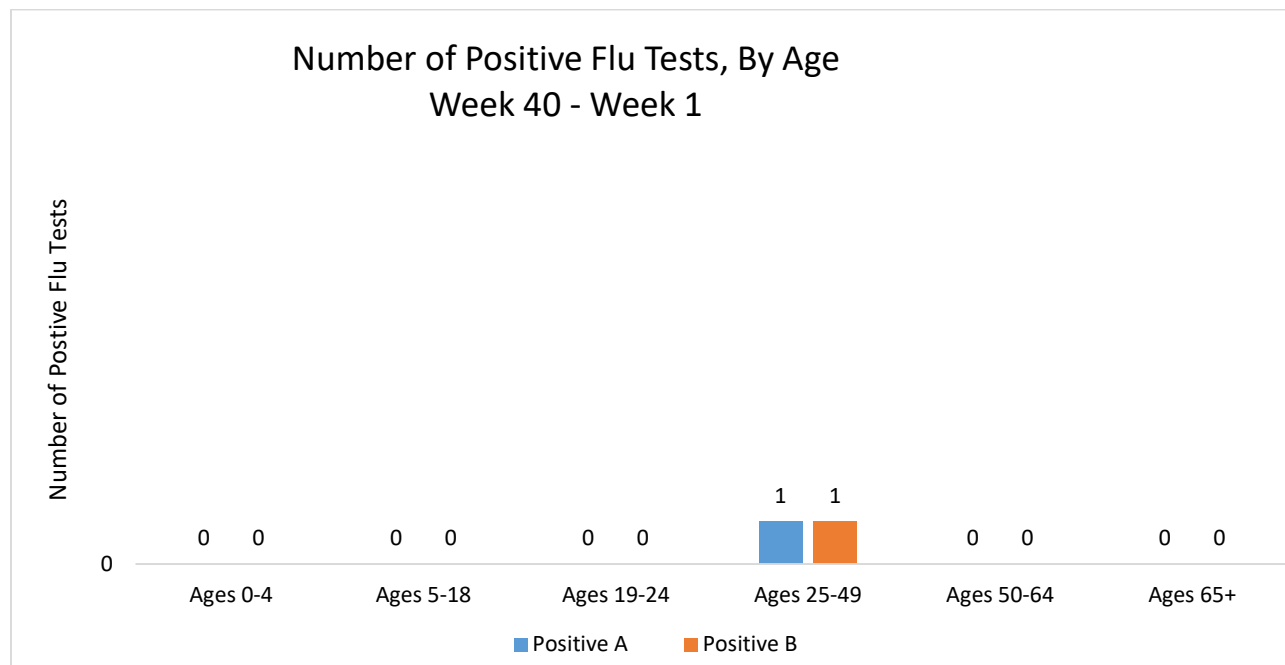

Week 1 Positive Flu Tests, Age Distribution

Flu Tests	Count (Age 0-4)	Count (Age 5-18)	Count (Age 19-24)	Count (Age 25-49)	Count (Age 50-64)	Count (Age 65+)
Tests completed	4	1	1	1	4	5
Positive A	0	0	0	0	0	0
Positive B	0	0	0	0	0	0

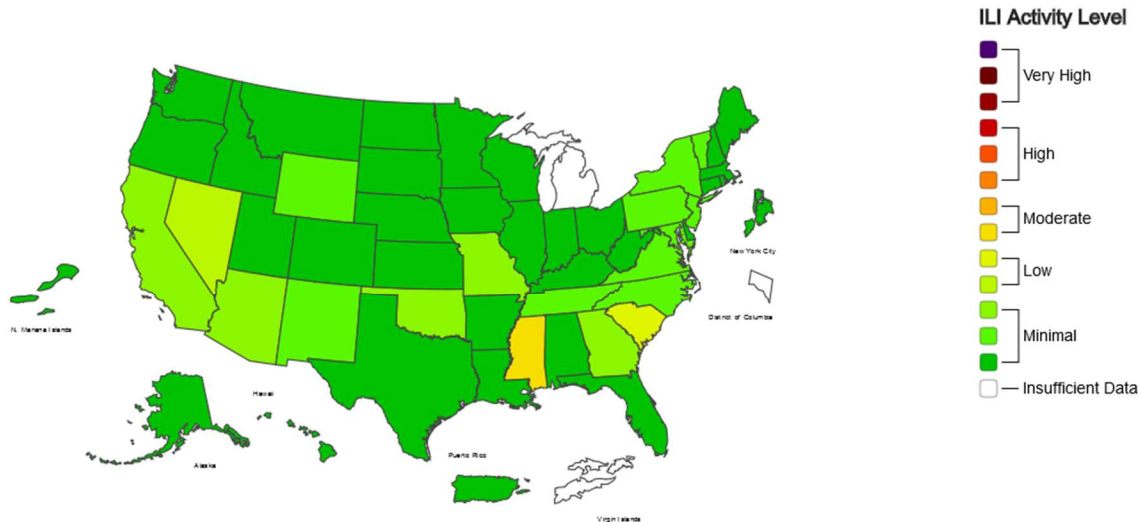

Cumulative Influenza Numbers to date	2018	2019	2020	2021
Influenza Associated Hospitalizations (IAH) Reported by Admission Year ³	74	61	56	0
IAH Comparison by flu season week (October-May or weeks 35-20). Current season (2020-2021)	2017-2018 78	2018-2019 53	2019-2020 68	2020-2021 0

Cumulative Influenza Numbers to date- In 2021, there have been 0 influenza associated hospitalizations. There is 0 influenza associated hospitalizations for the 2020-2021 Influenza season. This data is received from the Ohio Disease Reporting System.

The CDC reporting is 1 week behind our current report. The following is the CDC ILI map for week 52.

A Weekly Influenza Surveillance Report Prepared by the Influenza Division
Influenza-Like Illness (ILI) Activity Level Indicator Determined by Data Reported to ILINet
2020-21 Influenza Season Week 52 ending Dec 26, 2020

*This map uses the proportion of outpatient visits to healthcare providers for influenza-like illness to measure the ILI activity level within a state. It does not, however, measure the extent of geographic spread of flu within a state. Therefore, outbreaks occurring in a single city could cause the state to display high activity levels.

*Data collected in ILINet may disproportionately represent certain populations within a state, and therefore may not accurately depict the full picture of influenza activity for the whole state.

*Data displayed in this map are based on data collected in ILINet, whereas the State and Territorial flu activity map are based on reports from state and territorial epidemiologists. The data presented in this map is preliminary and may change as more data is received.

*Differences in the data presented by CDC and state health departments likely represent differing levels of data completeness with data presented by the state likely being the more complete.

*For the data download you can use Activity Level for the number and Activity Level Label for the text description.

*This graphic notice means that you are leaving an HHS Web site.

For more information, please see CDC's Exit Notification and Disclaimer policy.

For more information on the methodology, please visit Outpatient Illness Surveillance methods section.
