

Fremont County School District # 1

Annual Asbestos Notification

2019-2020 School Year

Under AHERA (Asbestos Hazard Emergency Response Act), all primary and secondary schools are required to develop and implement a plan for managing all building materials which contain asbestos. Included in the AHERA Act is the requirement to annually notify all works and building occupants (or their guardians) of asbestos-related activities.

Beginning in 1988, all buildings owned, leased, or “under the control of” the Fremont County School District #1 were inspected by EPA accredited inspectors, with building material samples analyzed by an independent laboratory. Based on the inspection, the School District prepared an approved comprehensive management plan for managing the asbestos.

Where the asbestos-containing materials are found, the District has in place an Operations and Maintenance program.

The District has accomplished the following compliance mandates regarding the administration of asbestos in school buildings:

- The District is continuing with the Operations and Maintenance. This ensures that all asbestos materials are kept in good condition.
- Periodic “surveillance” in each are containing asbestos has been completed every six months.
- The buildings are re-inspected by an accredited inspector every three years. The last three year re-inspections were conducted in November 2019 by Abbey Environmental Management, Inc.
- All outside contractors shall contact the Facility Director before commencing work.
- A copy of the Asbestos Management Plan is available for review by contacting the District Office, as well as on the District website. (www.landingschools.org)
- Questions related to this plan or any other asbestos concerns should be directed to the District’s Asbestos Designated Person, Travis Sweeney, 307-332-4711, tsweeney@landingschools.org.
