

**Course development: Made easy. Made for faculty.**

## Meet the first fully-integrated course development tool for academic leaders

Scaffold Designer is an innovative but simple course development tool designed specifically to help faculty build their online courses. Its easy-to-use features and guided step-by-step process eliminates the status-quo of traditional lengthy, arduous, time-intensive course development models.

Build courses that meet and exceed academic standards in a matter of hours.

**Guided course development:** Easy-to-use, step-by-step guide for building courses

**Outcomes builder:** Course objectives matched to outcomes using featured built-in Bloom's Taxonomy builder

**Available in prominent LMS Platforms:** Blackboard Ultra and Canvas (D2L coming soon)

*Scaffold Designer gave us a checklist so that everything was covered—all the main components of a course that need to be created were spelled out. It easily walks you through the course development process, and, if you get stuck, the notes guide you.*

- Christina McKay, J.D.

# Take charge of your course development

Faculty who use Scaffold Designer will immediately notice how these stand-out features simplify and speed up the course development process. Designer puts course development back in the hands of the experts.

Instead of doing what's easiest first, the faculty member will progress through a logical process. And, the most important thing is that there is a parallel structure throughout the course—anyone using Scaffold Designer has a comprehensive map.

- Dr. Rachel Sandomir

**Save time:** Significantly reduce course development time—build a course in mere hours

**Create engaging & robust courses easily:** faculty-friendly, plug-and-play, guided course creation tools without needing HTML

**Build consistency in course-design:** centralized content for institutional messaging & guidelines

## Build better courses today

Scaffold Designer offers a step-by-step, **guided development process** that auto populates content and aligns with your institution's messaging. Faculty will also be able to **map course objectives** to outcomes using Designer's Bloom's Taxonomy Builder to ensure courses meet and exceed even the most rigorous academic standards.

No web design skills? No problem. Designer's **course development templates** offer pre-built pages and modules that simplify course design. Faculty can even embed YouTube videos straight into a course, all without the need for HTML or advanced technical skills.
