ARIZONA COURTS HEALTH SCREENING PROTOCOLS FOR THE PUBLIC

The Arizona Judiciary is committed to the safety of the public, judges and court personnel. Pursuant to Supreme Court Administrative Order No. 2020-114, the Administrative Office of the Courts has established the following health screening protocols for Arizona's courts, effective June 1, 2020, updated August 10, 2020:

LEVEL 1: BASIC SCREENING (No Security Personnel; No Body Temperature Screening)

In courts that do not have security screening, courts should ask the public to self-screen and not come to court with any of the following:

- Persistent unexplained symptoms any time within the last 10 days:
 - Fever over 100.4 degrees Fahrenheit or body chills
 - Cough
 - Shortness of breath or difficulty breathing
 - Fatigue
 - Muscle or body aches
 - Headache
 - New loss of taste or smell
 - Sore throat
 - Congestion or runny nose
 - Nausea or vomiting
 - Diarrhea
- At-risk conditions:
 - Have had a COVID-19 diagnosis or a positive test result during the last 10 days.
 - Close contact with someone who has tested positive for COVID-19 or has symptoms consistent with the COVID-19 virus during the last 14 days. A close contact is defined as anyone who was within 6 feet of an infected person for at least 15 minutes.

Note: Information on COVID-19 symptoms and a self-check process are updated frequently and can be found on the Centers for Disease Control and Prevention (CDC) website at [Symptoms of Coronavirus](#). The CDC also provides information on the difference between symptoms of COVID-19 and Influenza (flu). Please refer to this website for the most current guidance.

Courts shall provide notice to the public of this additional screening through communications about any court proceeding, posting the information on the court's website, and posting signage at all courthouse entrances.

Service to Individuals Who Report Symptoms or Conditions: Courthouse visitors who have any of the above symptoms or conditions should call the court to reschedule or be referred to appropriate electronic or on-line options for finding information, filing of motions, or other court services. Court staff should take appropriate action to provide access to court services while maintaining appropriate safeguards. In-person proceedings should not be scheduled until cessation of symptoms, a diagnosis of a non-contagious condition that explains a symptom, or negative COVID-19 test results no longer indicate COVID-19 infection under CDC guidelines or direction from other state and county health authorities.

**LEVEL 2: BASIC + ENHANCED SCREENING
(Security Personnel; No Body Temperature Screening)**

In courts with security screening, security officers or other designated court staff shall ask courthouse visitors the following two questions:

1. Have you tested positive or experienced any symptoms of COVID-19 in the last 10 days?
2. Have you had contact with someone who has tested positive for the COVID-19 virus in the last 14 days?

If a courthouse visitor answers "yes" to any of these questions, the visitor shall be excluded from entering the courthouse until:

1. Ten days have passed since the onset of symptoms, 24 hours have passed since fever resolved without use of medication, and other symptoms have improved.
2. Fourteen days have passed after close contact with someone with COVID-19 illness with no development of symptoms. A close contact is defined as having been within 6 feet of an infected person for at least 15 minutes.
3. If exclusion is for a symptom, a medical diagnosis other than COVID-19 explains that symptom.
4. Negative COVID-19 test results indicate no COVID-19 infection under CDC guidelines.

Courts shall provide notice to the public of this additional screening through communications about any court proceeding, posting the information on the court's website, and posting signage at all courthouse entrances.

Service to Individuals Refused Entry: Courthouse visitors who are refused entrance will be provided a phone number to reschedule or be referred to appropriate electronic or on-line options for finding information, filing of motions, or other court services. Security and other court staff should take appropriate action to provide access to court services while maintaining appropriate safeguards.

Security officers should be masked and gloved while screening courthouse visitors.

**LEVEL 3: ENHANCED + SECURITY PERSONNEL
DOING BODY TEMPERATURE SCREENING**

If approved by Judicial leadership pursuant to AO 2020-114, Section I (10), courthouse visitors may be screened for body temperature at entrances to the courthouse if:

1. Temperature screening is conducted by court personnel with a non-touch, calibrated human electronic temperature device;
2. Security is masked and gloved; and
3. Equipment is frequently sanitized for everyone's protection.

In the event that a courthouse visitor is found to have a temperature of 100.4 degrees Fahrenheit or above, the visitor should be retested after the initial temperature test. If the temperature is not below 100.4 degrees Fahrenheit, the visitor shall be excluded from entering the courthouse until body temperature is below 100.4 degrees Fahrenheit, a diagnosis of a non-contagious condition that explains an excessive temperature, or negative COVID-19 test results indicate no COVID-19 infection under CDC guidelines.

Courts shall provide notice to the public of this additional screening through communications about any court proceeding, posting the information on the court's website, and posting signage at all courthouse entrances.

Service to Individuals Refused Entry: Courthouse visitors who are refused entrance will be provided a copy of this protocol, a phone number to reschedule or be referred to appropriate electronic or on-line options for finding information, filing of motions, or other court services. Security and other court staff should take appropriate action to provide access to court services while maintaining appropriate safeguards.

Note: Courts should check manufacturer specifications to confirm temperature screening devices being used are accurate when used in high-temperature climates.
