

INSTRUCTIONS FOR SUBMITTAL OF A NOTICE OF INTENT TO DISCHARGE FOR AN ON-SITE WASTEWATER TREATMENT FACILITY

INSTRUCTIONS

Please fill out and submit this Notice of Intent to Discharge (NOI) to obtain authorization to construct and operate an on-site wastewater treatment facility. ADEQ currently has 22 general aquifer protection permits for on-site systems. An on-site system is a septic system that disposes domestic waste on the property. By far, the most common type of on-site system is the septic tank, which is sometimes called a conventional system. ADEQ has developed the Type 4.02 general permit for septic tanks. Systems other than conventional septic tanks are called alternative systems. These include technologies such as Wisconsin mounds, composting toilets, and pressurized systems, just to name a few. This form can be used for any on-site wastewater treatment facility with a design flow less than 3,000 gallons per day (gpd). Wastewater treatment facilities with a design flow greater than or equal to 3,000 gpd must obtain an individual aquifer protection permit.

Type 4 on-site general permits can be combined if the general permit conditions prescribed in rule are met. For example, you may combine a 4.02 septic tank general permit may be combined with a pressure distribution system (4.04) and Wisconsin Mound (4.08) general permit.

GENERAL APPLICATION PROCESS

1. Submit this NOI and appropriate supplemental information and forms, which are identified in this form. Only one copy of the NOI is needed.
2. Remit the applicable non-refundable general permit fee per A.A.C. R18-14-103, Table 1 (listed below). Review fees established by delegated counties or cities may differ.
3. Satisfy any deficiency requests arising from the Department's pre-construction review of the submitted information.
4. Receive a "Construction Authorization" from the Department authorizing construction of the wastewater treatment facility.
5. Construct the wastewater treatment facility within two years.
6. Upon completion of construction, submit the Request for Discharge Authorization and any additional required information to the Department to initiate the Department's post-construction review and inspection.
7. Satisfy any deficiency request arising from the Department's post-construction review of the facility.
8. Receive a "Discharge Authorization" from the Department, which authorizes operation of the septic tank in accordance with the terms of the Type 4.02 to 4.17 General Aquifer Protection Permits and applicable requirements of statute and rule.

In addition to this form, other required documents are:

- Site Suitability Guidelines and Checklist for 4.02 (Conventional) Disposal
- Uniform Site Investigation Report
- Contractor Licensing Compliance Form
- Two (2) copies of the site plan and construction quality drawings
- Fixture Count Chart / Daily Design Flow Chart
- Proof of ownership
- Map OR driving directions to the property

These required forms are available at www.azdeq.gov or by calling our office at (928) 337-7607.

Apache County has an ordinance that regulates development in floodplain areas. Part of that ordinance requires all on-site waste disposal systems within a floodplain be designed by a professional engineer to avoid impairment to the system or contamination from the system during flooding. Also, all proposed systems within a floodplain will be required to apply for and receive a Flood Hazard Development Permit. A property smaller than 1 acre requires a variance permit. A parcel with two or more residences or dwellings requires a conditional use permit. These permits must be obtained from the Planning & Zoning Department prior to issuance of a septic permit.

Permit will only be issued to owner of the parcel or licensed contractor.

NOTE: WHEN REQUESTING INSPECTIONS GIVE PERMIT #, ADDRESS, LOT#, AND TYPE OF INSPECTION.
DO NOT COVER WORK UNTIL THAT PORTION HAS BEEN APPROVED.

FEES

Fees for Type 4 General Aquifer Permits are listed in the table below. For onsite wastewater treatment facilities that combines elements from more than one Type 4 General Permit, the applicant shall pay the greatest fee established in table below for the appropriate Type 4 General Permit.

General Permit Type	Description	Fee
4.02	Septic tank/conventional disposal, less than 3000 gallons per day	\$300
4.03	Composting toilet, less than 3000 gallons per day	\$550
4.04	Pressure distribution system, less than 3000 gallons per day	\$550
4.05	Gravelless trench, less than 3000 gallons per day	\$550
4.08	Wisconsin mound, less than 3000 gallons per day	\$550
4.09	Engineered pad system, less than 3000 gallons per day	\$550
4.14	Sewage vault, less than 3000 gallons per day	\$550
4.17	Cap system, less than 3000 gallons per day	\$550

LICENSING TIME FRAMES

Licensing Time Frames are specified by Arizona Department of Environmental Quality in A.A.C. R18-1-525, which limits the number of business days ADEQ can review your project without a penalty. They are:

License Type	Administrative Completeness Review	Substantive Review	Overall Time Frame
Pre-Construction			
Single 4.02, 4.03, 4.13, and 4.14 General Permits	21	21	42
4.23 General Permit	21	62	83
Combined Two or three Type 4 General Permits	21	32	53
Combined Four or more Type 4 General Permits	21	62	83
Post-Construction			
Single 4.02, 4.03, 4.13, and 4.14 General Permits	21	10	31
4.23 General Permit	21	32	53
Combined Two or three Type 4 General Permits	21	21	42
Combined Four or more Type 4 General Permits	21	32	53

Note: Each request for an alternative design, installation, or operational feature under A.A.C. R18-9-A312(G) to a Type 4 General Permit adds eight business days to the substantive review time-frame.

APACHE COUNTY – NOTICE OF INTENT TO DISCHARGE – ONSITE WASTEWATER TREATMENT SYSTEMS

3 Contact Person/Agent (if different from applicant)

Name _____ Phone _____

Title _____ Firm Name _____

Mailing Address _____ City _____ State _____ Zip _____

Email _____

4 Site Information

County _____ City _____

Township _____ Range _____ Section _____

Latitude _____ ° _____ ' _____ " N Longitude _____ ° _____ ' _____ " W

Address _____ Parcel Number _____ Size _____ Acres _____

5 Existing Environmental Permits

List any other federal or state environmental permits issued for or needed by the facility, including any individual permit, Groundwater Quality Protection Permit, or Notice of Disposal that may have previously authorized the discharge (attach additional pages if necessary)

SUPPLEMENTAL INFORMATION

6 Information and Submission Requirements (Check All Completed Items)

- Site Investigation Report per A.A.C. R18-9-A309(B)(1)
- Site Plan per A.A.C. R18-9-A309(B)(2)
- Agency review fee (see instructions)

7 Design Flow and Strength of Wastewater

A) Design flow per A.A.C. R18-9-A309(B)(3) _____ gallons per day

B) The expected strength of the wastewater (if the strength exceeds the levels for typical sewage) is attached? Yes

C) For single family dwelling, a list of the number of bedrooms and plumbing fixtures and corresponding unit flows used to calculate the design flow of the facility per A.A.C. R18-9-A314.

Wastewater Source	Number	Unit Flows used to calculate the design flow of the facility

Floodplain Review: Out of Floodplain _____

Reviewed By: _____

Within Floodplain _____

Date Reviewed: _____

D) For a dwelling other than for a single-family, a list of each wastewater source and corresponding unit flows used to calculate the design flow of the facility

Wastewater Source	Number	Unit Flows used to calculate the design flow of the facility

8 List of Materials, Components, and Equipment

A list of materials, components, and equipment for constructing the on-site wastewater treatment facility is attached? Yes

9 Selected General Permits (Check All General Permits that Are being Applied for)

4.02 Septic Tank With Disposal by Trench, Bed, Chamber Technology or Seepage Pit, Less than 3,000 Gallons Per Day (GPD) Daily Flow

- A) This on-site wastewater treatment facility consists of a conventional septic tank system and disposal field sized for a design flow of _____ gallons per day. The septic tank conveys wastewater to a disposal field consisting of (check one):
 - 1. Trench
 - a. Filled with aggregate [A.A.C. R18-9-101(1)], or
 - b. Filled with crushed, recycled concrete [A.A.C. R18-9-E302(C)(2)(d)]
 - 2. Bed
 - 3. Chamber technology
 - 4. Seepage pit.
- B) The expected date of first operation of this system is _____. The sewage to the septic tank has the characteristics of: Typical household sewage or Typical household sewage and _____
- C) This on-site wastewater treatment facility is for (check one)
 - Conventional Septic Tank System Serving a Single-Family Residence.
 - Conventional Septic Tank System Serving Other Than a Single-Family Residence.

4.03 Composting Toilet, Less than 3,000 GPD Daily Flow

- A) Composting toilet system manufacturer name _____
- B) Composting toilet system manufacturer address _____
- C) A copy of the manufacturer’s warranty, and the specifications for installation, operation, and maintenance has been provided? Yes
- D) The product model number _____
- E) Calculations for the composting rate, capacity, and waste accumulation volume are attached? Yes
- F) Documentation of listing by a national listing organization indicating that the composting toilet meets the stated manufacturer’s specifications for loading, treatment performance, and operation has been attached (unless the composting toilet is listed under R18-9-A309(E) or is a component of a reference design approved by the Department)? Yes
- G) Describe the vector control method. _____
- H) Describe the planned method and frequency for disposing the composted human excrement residue. _____
- I) Describe the planned method for disposing of the drainage from the composting unit. _____
- J) The number of bedrooms in the dwelling or persons served on a daily basis, as applicable. _____
- K) What is the corresponding design flow of the disposal works for the wastewater? _____
- L) The results from soil evaluation or percolation testing that adequately characterize the soils into which the wastewater will be dispersed and the locations of soil evaluation and percolation testing on the site plan have been provided? Yes
- M) The design for the disposal including the location of the interceptor, the location and configuration of the trench or bed used for wastewater dispersal, the location of connecting wastewater pipelines, and the location of the reserve area has been provided? Yes

4.04 Pressure Distribution System, Less than 3,000 GPD Daily Flow

- A) A copy of operation, maintenance, and warranty materials for the principal components has been attached? Yes
- B) A copy of dosing specifications, including pump curves, dispersing component curves, and float switch settings is attached? Yes

4.05 Gravelless Trench, Less than 3,000 GPD Daily Flow

- A) The soil absorption area that would be required if a conventional disposal trench filled with aggregate was used at the site? Yes
- B) The configuration and size of the proposed gravelless disposal field is attached? Yes
- C) The manufacturer’s installation instructions and warranty of performance for absorbing wastewater into the native soil is attached? Yes

4.08 Wisconsin Mound, Less than 3,000 GPD Daily Flow

- A) Specifications for the internal wastewater distribution system media proposed for use in the mound are attached? Yes
- B) Two scaled or dimensioned cross sections of the mound (one of the shortest basal area footprint dimension and one of the lengthwise dimension) are attached? Yes
- C) Design calculations following the “Wisconsin Mound Soil Absorption System: Siting, Design, and Construction Manual,” published by the University of Wisconsin - Madison, January 1990 Edition have been provided? Yes

4.09 Engineered Pad, Less than 3,000 GPD Daily Flow

- A) Design materials and construction specifications for the engineered pad system are attached? Yes

4.14 Sewage Vault, Less than 3,000 GPD Daily Flow

4.17 Cap System, Less than 3,000 GPD Daily Flow

- A) The specifications for the proposed cap fill material have been attached? Yes

10 Additional On-site Requirements

For a facility that includes treatment or disposal works permitted under a Type 4.03 to 4.23 General Aquifer Protection Permits (A.A.C. R18-9-E303 through R18-9-E323):

- A) Construction quality drawings that show the items listed in A.A.C. R18-9-A309(B)(6)(a) is attached? Yes
- B) A draft operation and maintenance manual for the on-site wastewater treatment facility consisting of the tasks and schedules for operating and maintaining performance over a 20-year operational life is attached? Yes

11 Alternative Request (Check One)

- I am **not** requesting an alternative design, setback, installation, or operational feature (most common).
- I am requesting an alternative design, setback, installation, or operational feature in accordance with A.A.C. R18-9-A312(G) and the following items have been attached:
 - A) The additional fee (see instructions);
 - B) A description of the requested change;
 - C) A citation to the applicable feature of technology, design, setback, installation, or operational requirement for which the change is being requested; and
 - D) Justification for the requested change, including any necessary supporting documentation.

12 Certification (to be completed by Applicant in item 2)

I, _____, certify that this Notice of Intent to Discharge and all attachments were prepared under my direction or authorization and all information is, to the best of my knowledge, true, accurate and complete. I also certify that the on-site wastewater treatment facility described in this form is or will be designed, constructed, and operated in accordance with the terms and conditions the General Aquifer Protection Permit(s) (A.A.C. R18-9-E302 through R18-9-E323) and applicable requirements of Arizona Revised Statutes Title 49, Chapter 2, and Arizona Administrative Code Title 18, Chapter 9 regarding aquifer protection permits. I am aware that there are significant penalties for submitting false information including permit revocation as well as the possibility of fine and imprisonment for knowing violations.

FIXTURE COUNT CHART and DAILY DESIGN FLOW CHART

Complete the Fixture Count Chart. Use the System Design Flow Chart to determine tank size and design flow. Circle the appropriate minimum tank size and system daily design flow.

FIXTURE COUNT CHART					
Residential Fixture Type	Proposed # of Each Fixture Type	Multipl y by	Fixtur e Units	Equal s	Total # of Fixtures Units
Bathtub		x	2	=	
Bidet		x	2	=	
Dishwasher, service		x	2	=	
Clothes washer (with or without laundry tub)		x	2	=	
Utility tub or sink separate from clothes washer		x	2	=	
Sink, Kitchen (with or without dishwasher)		x	2	=	
Shower, single stall		x	2	=	
Sink, bar		x	1	=	
Sink, service		x	3	=	
Lavatory, single or double		x	1	=	
*Toilet, 1.6 gallons per flush (gpf)		x	3	=	
*Toilet, between 1.6 and 3.2 gpf		x	4	=	
*Toilet, greater than 3.2 gpf		x	6	=	
FIXTURE COUNT TOTAL				=	
PHYSICAL NUMBER OF BEDROOMS				=	
*Toilets currently available in Arizona are 1.6 gallons per flush. Older fixtures may not use the same amount of gallons per flush.					
SYSTEM DESIGN FLOW CHART					
Number of Bedrooms	Fixture Count	Minimum Tank Size (gals)		System Design Flow (gpd)	
1	7 or less	1000		150	
	More than 7	1000		300	
2	14 or less	1000		300	
	More than 14	1000		450	
3	21 or less	1000		450	
	More than 21	1250		600	
4	28 or less	1250		600	
	More than 28	1500		750	
5	35 or less	1500		750	
	More than 35	2000		900	
NOTE: For a single residence with more than 5 bedrooms, use R18-9-A314(4)(A) as the basis for determining septic tank size and system design flow.					

PROFESSIONAL ENGINEERS and/or REGISTERED SANITARIANS

This list is provided by Apache County solely as a courtesy. This list does not constitute an endorsement or recommendation by the County of any particular business. Other qualified businesses not listed below may also exist. It is the property owner's responsibility to verify that the person they hire is qualified to do site assessments and has a current license.
