

Hello Wonderful Nazareth Families,

I hope this email finds you safe and well.

I wanted to reach out to you in video, to update the Nazareth community about the beginning of our school year, regarding both for Distance Learning and On-Campus instruction. We are working hard to ensure that we identify any unfinished learning from the spring, develop our best educational practices for both Distance Learning and in-class teaching, and focusing on our educational standards and curricular goals. We also are paying close attention to the social-emotional aspect of learning for all of our Nazareth students. Let us pray for all of the students, families, staff and communities at-large who have been touched by the pandemic.

Attached is the Re-opening Updated Letter to Parents, from the Diocese of San Diego Office for School, it explains the waiver option that Governor Newsom eluded too in his press conference. They will be advocating for all Catholic schools to return to on-campus learning, but this process is far from being completed. In addition, it communicates where parents may contact the state with their personal worries and concerns.

On a lighter note, I have created a fun video for the entire family to enjoy.
