

Investigations: K-12 Settings

- In all scenarios below, a student or staff is considered a close contact when they are within **6 feet of the COVID-19 positive individual for 15 minutes or more.**
- Contacts who are asked to self-monitor should monitor themselves closely for COVID-19 symptoms during the two weeks after exposure. If they develop symptoms, they should stay home and contact a healthcare provider about testing for COVID-19. If contacts who are self-monitoring develop symptoms but do not get tested, they should remain home until at least 10 days after symptom onset.
- K-12 students or staff who are **close contacts due to exposure to a household member are required to quarantine.**

When a masked student/staff tests positive and close contacts were wearing masks.
