Hello QCUSD families,

As you know, schools are closed through April 10 in response to COVID-19. During this time, the QCUSD Educational Services Department continues to move forward with implementing a high-quality remote learning instructional program. You should have received a letter from your child's teacher that Google Classroom (K-8) and/or Edgenuity (9-12) will be the on-line platforms utilized by individual teachers or grade levels to provide on-line educational services.

QCUSD recognizes that there are students who will need support in gaining access to a device during school closures. If you are in need of technology to access the above web-based platforms please email your youngest child's principal to make a request.
