

IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER

Monitoring Requirements Not Met for Animas School System

Este informe contiene información importante acerca de su agua potable. Haga que alguien lo traduzca para usted, o hable con alguien que lo entienda.

On 10/30/2015, we became aware that our system recently failed to collect monitoring samples required by the Stage 2 Disinfectants/Disinfection Byproducts Rule. Although this incident was not an emergency, as our customers, you have a right to know what happened, and what we are doing to correct the situation.

We are required to monitor your drinking water for specific contaminants on a regular basis. Results of regular monitoring are an indicator of whether or not our drinking water meets health standards. Table 1 list the contaminants and the compliance periods for which we did not monitor correctly. Because these samples were not collected, we cannot be sure of the quality of our drinking water during the compliance periods listed below.

Contaminants	Sample Name (Address)	Compliance Period
Total Trihalomethanes	DBP-DIST (High School Field House)	July 2015
Haloacetic Acids	DBP-DIST (High School Field House)	July 2015

Table 1

What should you do?

There is nothing you need to do. You do not need to boil your water or take other corrective actions. You may continue to drink the water. If a situation arises where the water is no longer safe to drink, you will be notified within 24 hours.

What happened and what is being done?

Water lab received sample @ a high temperature, should be @ 4°C. Submit sample @ next required date around July 2016.

We anticipate resolving the problem within required date time frame.
